VORTEX

TRAY FORMER

REMOTE ASSISTANCE

VORTEX is family of a few different tray forming solutions.

VORTEX designed as middle speed solution with capacity up to 22 trays per minute and HI SPEED solution for up to 40 trays per minute, designed for hi-capacity production lines.

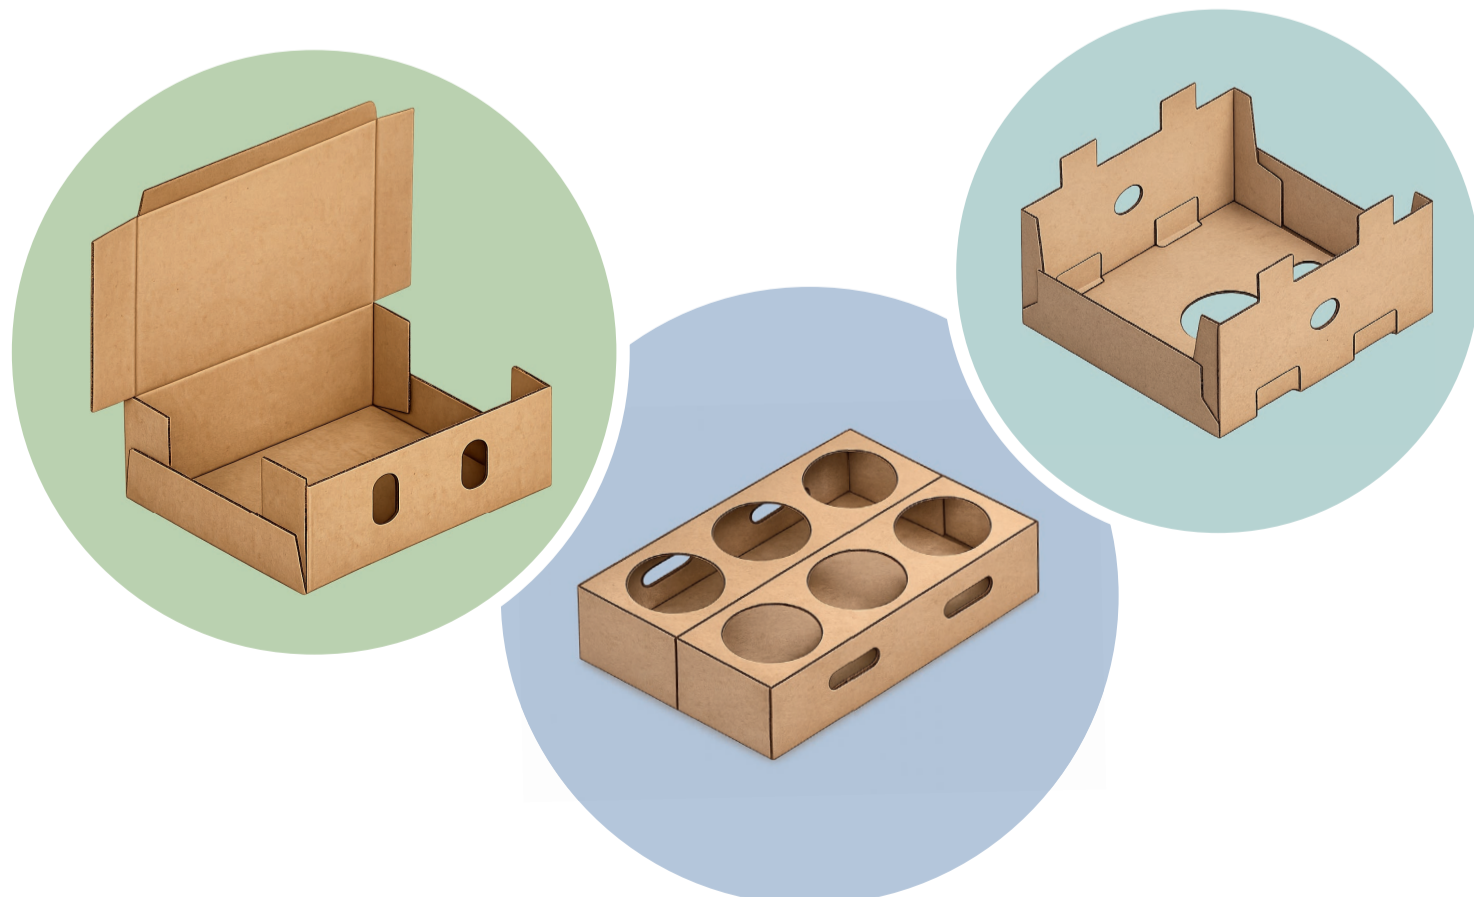

VORTEX HI SPEED solutions all movement achieved by servo motors and motion control system.

Machinex tray formers **VORTEX** are designed for demanding working regime in dairy and other production facilities in 24/7 working hours.

Additionally, VORTEX can be delivered with loading module! Presented as special CombyPack page.

VORTEX machine is indexing motion system for cardboard blank puling and tray forming in a few stations simultaneously. This process is fully automated, controlled by system of sensors, PLC programme and powered by electro motors (in HS solution by servo motors and drives), provides formed trays on 90° and precisely positioned.

VORTEX machines are adjustable for different tray dimensions. Change over time is up to 20 minutes.
